SKILLS

- Automation Testing
- Manual Testing
- Java
- Selenium WebDriver
- TestNG
- Maven
- JIRA
- SQL
- Data-Driven Testing
- Extent Reports
- Log4j
- API Testing(Postman)
- Cucumber

EDUCATION

- Master of Computer Applications (MCA) 2018 - 2021**
Dayananda Sagar Institutions, Bangalore
- Bachelor of Computer Applications (BCA) 2015 - 2018**
Vijayanagara College, Hosapete

PROFILE

Motivated MCA graduate with 3 years of experience in software testing, specializing in Selenium WebDriver (Java), TestNG, and automation frameworks. Proven ability to design and execute test strategies that improve product quality, reduce manual effort, and accelerate release cycles. Skilled in POM, data-driven testing, and defect management. Adept at collaborating with crossfunctional teams to deliver high-quality software in Agile environments.

WORK EXPERIENCE

Capgemini Technology Services India Limited (2022 - 2025)

- Designed and executed manual & automated test cases, ensuring maximum coverage.
- Developed and maintained Java-Selenium-TestNG scripts, reducing regression effort.
- Performed smoke, sanity & regression testing; collaborated to resolve defects quickly.
- Created and maintained precise test documentation aligned with project requirements.

PROJECTS

AT&T

- Led integration, system testing, and validation of firmware/software for high performance.
- Coordinated firmware upgrade/downgrade activities, minimizing downtime and ensuring quality.
- Developed sanity test cases, improving defect detection and product reliability.
- Implemented BIST test cases to enhance automated diagnostics and system verification.

QA Automation Dashboard – Personal Project

- Designed and developed a full-stack QA automation analytics platform to centralize CI execution results.
- Integrated Selenium-TestNG framework with Jenkins CI to automatically publish test execution metrics.
- Implemented REST APIs using Spring Boot to parse TestNG XML reports and persist results in PostgreSQL.
- Built interactive React dashboard displaying pass percentage, failure trends, and project-wise analytics.
